# Stephen Harper's killer legacy

**All asbestos kills.** That's why over 50 countries have banned it, and why the World Health Organization has called for an end to its use. That's why no industrialized country, including Canada, uses it. That's why we spend millions of dollars removing it from our schools, hospitals and homes.

But Canada still exports asbestos to developing countries. Stephen Harper is the only national political leader who still supports the export of asbestos.

**Prime Minister Harper, stop exporting asbestos disease to the developing world.**
